Renault India bets big on Tribler, to focus on sub 4-metre segment

FF BUREAU
Chennai, August 13

RENAULT INDIA IS betting big on its forthcoming new car — Tribler — to stem the slide over the months. The company sees that Tribler, to be positioned uniquely with its sub 4-metre design, will not only bring cheers to the company but also boost the morale of its dealers with a profitable growth. The company also hinted at launching a made-in-India EV by 2022. The company made-in-India EV that will focus more on sub 4-metre segment, which alone holds 75% of the total industry volume in India, and accordingly, will add a new product — probably a SUV named HBC under sub-4 metre — sometime next year to double its market share to 5% in next two years, said Venkatram Mamillapalle, country CEO and managing director, Renault India. The bookings of Tribler opens on August 17 for ₹11,000 and it will be officially launched in India on August 28. "We thought current recession period is the right time to launch a product like Tribler, which gives customers ample time to analyse the new car, its features and its price positioning. We are not positioning it as a SUV or MPV. It is a unique car," he said. In an interactive session with media on Tuesday, he said: "It's absolutely a new car developed under RBC platform (a French one) and it is being made in India for India and global markets. It is the seat car to come out with 100 different configurations in India, targeted at youths, farmers, camps, business people, media and everyone and will have a killer pricing to see that Tribler will become a gamechanger for us like that of Duster and Kwid earlier."

The bookings for Tribler open on August 17 for ₹11,000. The car will be officially launched in India on August 28. It is expected to come in four variants, including AMT at a later stage, will have six colours and likely to be priced at around ₹5 lakh

While declining to comment on the exact pricing of the car, he, however, hinted that the car may be positioned between its competitor Maruti's Wagon R and Ertiga with a seating capacity from 2 to 7 seats (can be converted according to one's choice) and complete AC across all rows inside the car. "Though targeted to sell a minimum of 7,000 units a month, we would be happy if we sell 5,000 units a month," Venkatram said. The car — expected to come in four variants, including AMT at a later stage — will have six colours and likely to be priced at around ₹5 lakh. In response to a volley of questions, he said: "The dealers are not doing well in terms of profitability. We believe that Tribler will make them not only happier in terms of sales but also profitability. Our motto is to ensure that dealers become profitable while we grow proportionately." As part of this focus, the company is going to double its 'touch points' to 750 in next 3 years from current 320-level, under 120 dealerships. "We don't add dealers but touch points. Our core focus is to see that all the 'B' and 'C' class cities (Tier-II and -III) covered in expansion. We want to see that sales from rural cities will be around 50% in the next three years against 10% now. We have now only two products - Kwid and Duster - to offer in those cities. Out of the 350 touch points in India, 320 are from these 'B' and 'C' cities now. With the launch of Tribler, we hope sales from rural touch points gain momentum. With one more product - a SUV named HBC - next year, the sales from these cities substantially grow manifold." According to him, Tribler will also be exported to all right-hand drive markets, including South Africa, Indonesia, Australia, and the same will begin by end of this year. "Though we degrew by 7.5% in the first 46,000 of 2019 to a little over 46,000 units, we hope to end this calendar with 100,000 units in domestic market and 10,000 units in exports against 86,000 and 7,000+, respectively, in calendar 2018. Tribler to play a major role," he added.

On the EV side, the existing infra is not conducive for us to launch an EV at this point of time. India needs to improve a lot on the EV infra side. We have plans to launch an EV in India by 2022. The company is sourcing components worth euro 190 million annually for the last two years, he added.
